About Me

I'm Michael Onyekwere, a frontend and mobile Engineer with 3 years building scalable and user focused web and mobile application using React, Nextjs, Typescript and React Native. I've worked on a wide range of products, from real time dashboards to AI powered sass platforms to fintech projects and so much more consistently focusing on performance, accessibility and clean design.

Experience

Frontend Engineer

Veriscore, Lagos Nigeria - (Fintech)

Jan 2026 – Present

Key Qualities and Responsibility

- Build and optimize core dashboard interfaces that let founders track business health, view scoring insights, and generate a shareable Capital Passport to present to investors and secure funding.
- Translate complex scoring logic and financial data into intuitive, user-friendly UI components, improving clarity for founders and supporting better decision-making for investors.
- Design and build seamless user flows across the product, improving onboarding conversion and guiding founders from initial assessment to a full investment readiness score.

Key Achievement

- Designed and built a scoring engine that unifies financial, transactional, and compliance data into a single investment readiness score, the Capital Passport. It gives investors a consistent, comparable way to evaluate founders, while helping businesses build the credibility they need to access credit and funding.

Frontend Engineer

James Chase, UK – (Creative Branding & Design Agency)

March 2026 – May 2026

Key Qualities and Responsibility

- I designed and Developed an Installment based workflows, enabling customers to select and track flexible payment plan.
- I also engineered dynamic payment workflows that enable real time synchronization of merchant data (including business identity and payment links) across both merchant and customer facing portal.
- Developed search and filtering features to improve usability and data accessibility for both merchants and Admins.

Key Achievement

- Enhanced overall platform usability by streamlining merchant and payment workflows, driving more efficient and seamless user operations.

Frontend Engineer

Kaino Tech, Lagos, Nigeria - (Software Agency)

Sept 2024 – May 2025

Key Qualities and Responsibility

- I Designed and delivered a production- ready real estate platform that seamlessly connects property managers and tenants, enabling efficient property listing, discovery, and engagement.
- I also designed tenant - facing workflows for browsing properties, viewing details, and initiating communication with property managers.
- Participated in testing, debugging, and deployment processes to ensure a stable and reliable production release.

Key Achievement

- Built a scalable property listing platform that connects property managers and tenants, simplifying the process of finding and managing rental properties

Frontend Engineer

Glued Insight, Lagos Nigeria - (Data Analytics / Business Intelligence)

Jan 2026 – Present

Key Qualifications & Responsibilities

- Build dashboards and reporting interfaces that turn validated business data into clear, actionable insights, helping teams make faster, smarter decisions.
- I also transformed complex data into intuitive visual reports that make impact measurable and growth easy to track for clients and stakeholders.

Frontend Engineer

Josonseth Digital Consulting (JDC), Lagos Nigeria

Dec 2026 – Present

Key Qualifications & Responsibilities

- Translate client business requirements into clean, reusable code that keeps the product easy to extend as usage grows.
- I also collaborate daily with client product managers, designers and developers to plan, review and ship features on schedule

Frontend Engineer (Contract)

Ibass, Lagos, Nigeria - (Fintech)

August 2025 – Dec 2025

Key Qualifications & Responsibilities

- I mostly focused on UI refinements and application wide debugging to resolve visual functional issues, improve responsiveness and ensure key user flows work reliable
- Re- engineered the core dashboard navigation and tab structures, transitioning from a fragmented UI to a highly structured, intuitive user flow that improved data discoverability for users.
