Summary

Hi I'm Michael, a Frontend & Mobile Engineer with 3+ years of experience building fast, scalable, and user focused web applications using React, Next.js and Typescript. I've had the opportunity to work on a range of products, from real-time dashboards to AI-powered platforms to Fintech projects and so much more, consistently focusing on performance, accessibility, and clean design.

Experience

Frontend Engineer

GluedInsight, Lagos, Nigeria

Jan 2026 – Present

Key Qualifications & Responsibilities

- Built and optimized core dashboard interfaces for Glued Insight & Veriscore, enabling founders to easily track business health, scoring insights, and actionable recommendations in real time.
- Translated complex scoring logic and financial data into intuitive, user-friendly UI components, improving clarity for founders and enhancing decision-making for investors.
- Designed and built seamless user flows across Glued Insights & VeriScore, improving onboarding conversion and guiding founders from initial assessment to full investment readiness scoring.

Key Achievement

- Designed and built a scoring engine that aggregates financial, transactional, and compliance data into a unified investment readiness score called a "Capital Passport" which helps to improve evaluation consistency for investors at the same time helping business become credit worthy.

Frontend Engineer (Contract)

James Chase, Uk

March 2026 – May 2026

Key Qualifications & Responsibilities

- Designed and developed installment-based payment workflows, enabling customers to select and track flexible payment plans.
- Engineered dynamic payment workflows that enable real-time synchronization of merchant data (including business identity and payment links) across both merchant and customer facing systems
- Developed search and filtering features to improve usability and data accessibility for merchants.

Key Achievement

- Enhanced overall platform usability by streamlining merchant and payment workflows, driving more efficient and seamless user operations.

Frontend Engineer

Kaino Tech, Lagos, Nigeria

Sept 2024 – May 2025

Key Qualifications & Responsibilities

- Designed and delivered a production-ready real estate platform that seamlessly connects property managers and tenants, enabling efficient property listing, discovery, and engagement.
- Designed tenant-facing workflows for browsing properties, viewing details, and initiating communication with property managers.
- Participated in testing, debugging, and deployment processes to ensure a stable and reliable production release.

Key Achievement

- Built a scalable property listing platform that connects property managers and tenants, simplifying the process of finding and managing rental properties

Frontend Engineer (Contract)

Ibass, Lagos, Nigeria

August 2025 – December 2025

Key Qualifications & Responsibilities

- I mostly focused on UI refinements and application wide debugging to resolve visual and functional issues, improve responsiveness, and ensure key user flows worked reliable
- Re-engineered the core dashboard navigation and tab structures, transitioning from a fragmented UI to a highly structured, intuitive user flow that improved data discoverability for merchants.

Skills

Frontend: React, Next.js, Tailwind CSS, Responsive UI Development

Mobile Development: React Native (Expo)

State Management: Context API, Tanstack Query, Redux

Tools: Git, GitHub, Postman, VS Code, Antigravity

Deployment: Vercel, Netlify

Testing: Jest, Vitest, React Testing Library

Programming: JavaScript, TypeScript, HTML, CSS
